The first letter of **E. K.** is smudged and may be incorrect

AMBIDEXTROUS is a twelve letter *monthly* code-word which was used by **Rothman of Pall Mall** in the 1970's. They adapted the coding from **Rock City Tobacco** which they acquired in 1957. The year is provided by the second letter, using the regular pre-war alphabetic code starting with **E** in 1934, and reaching **J** in 1939. Any of the missing coded dates are **WANTED!** Note: **F. K.**, **Y. K.** and **Z. K.** do not fit.
